INTEROFFICE COMMUNICATION

August 25, 1999

TO: Amino tris(methyl phosphonic acid) file (CAS# 6419-19-8)

FROM: Gary Butterfield

SUBJECT: Screening level for amino tris(methyl phosphonic acid)

A June 9, 1999 CAS and NLM on-line literature search was conducted for amino tris(methyl phosphonic acid). No studies that could be used to set an ITSL were located. A review of standard secondary toxicology references also did not reveal any useable toxicity data.

No information that was useful for establishing a screening level was available for amino tris(methyl phosphonic acid). Therefore, the screening level is being established under R232(i) at $0.1 \mu\text{g}/\text{m}^3$ with annual averaging.
