Additional Information

2. Is This Information Confidential?

 Yes No

Most of the extrusion lines are not included in the existing permits/ROP. The extrusion lines that are included are focusing on the solvent used. To simplify and include all sources AKWEL formed a flexible group for extrusion lines (FGLINES), injection molding (FGIM) and solvent (FGSOLVENT). The extrusion and injection molding lines heat raw rubber to form hoses. On select lines the hoses pass through solvent to assist with the adhesion of multiple layers within the hose. This change will increase the amount of VOC emissions reported for the facility. EU-CTRPknitline and FGCADBAR will be removed from the current ROP and will now be part of FGLINES and FGSOLVENT.

In addition, EU-LINE138 has been permanently removed from the facility.
