

NOTICE of AIR PERMIT PUBLIC COMMENT PERIOD

The Michigan Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD) uses public comment periods and hearings to get community input. The public comment period and public hearing (if requested) are to allow the public the opportunity to comment on the proposed conditional approval of the air permits.

There is a public comment period until November 1, 2023 for:

Company: Smiths Creek Landfill and Blue Water Renewables, LLC, located at 6779 Smiths Creek Road in Smiths Creek, Michigan.

What they want to do: Renew their Title V Renewable Operating Permit (ROP) No. MI-ROP-N6207-20XX

- Large emitters of air pollutants, called “major stationary sources” are required to obtain and operate in compliance with an ROP pursuant to Title V of the federal Clean Air Act of 1990 and Section 5506(1) of Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended.
- The ROP is intended to simplify and clarify a facility’s applicable requirements and compliance with them by including all state and federal air quality requirements into one document.
- The proposed ROP will result in no emissions change at the facility.

Facility Responsible Officials: Matthew Williams, Landfill Manager (Section 1) and Kevin Dobson, VP – DTE Biomass Energy (Section 2).

Tell us what you think in any of these ways:

Comment via email to KarlM@Michigan.gov, by November 1, 2023

Send written comments by November 1, 2023:

Matthew Karl, Lansing District Office, EGLE, AQD, 525 West Allegan Street, First Floor South, Lansing, Michigan 48933

At Public Hearing, if held

To request a Public Hearing, you must submit your request in writing to the email or address above by November 1, 2023.
