

EU-EMERGENCYGEN Maintenance Schedule

Updated: May 15th, 2023

Kawasaki Motors Corp., U.S.A. utilizes a 121 horsepower diesel-fired emergency generator, and is compliant with the National Emissions Standards for Hazardous Air Pollutants for Reciprocating Internal Combusion Engines promulgated in 40 CFR Part 63, Subparts A and ZZZZ (Area Source MACT). This document is intended to be a live document describing the maintenance schedule specific to the generator, described in our ROP as "EU-EMERGENCYGEN" and described commercially as a Caterpillar 3208.

Caterpillar performs all services associated with the generator installed at the Kawasaki facility. This includes running the engine on a weekly basis for the purpose of maintenance. In addition to this, a yearly service is performed every November to adhere to the aforementioned regulations and the maintenance schedule attached below. This maintenance schedule is directly from the Operation and Maintenance Manual provided by Caterpillar upon the installation of the generator. Given the emergency purpose of the generator, it does not see alternate use. However, if an emergency situation occurs that necessitates the running of this engine, it will be documented by Kawasaki to ensure adherence with maintenance requirements.

### **Maintenance Schedule**

### **Naturally Aspirated Engines**

NOTE: For all generator maintenance activities, refer to the Generator and Control Panel Operation and Maintenance Manual for your generator set.

Use fuel consumption, service hours, or calendar time, whichever occurs first, to determine maintenance intervals. Experience has shown that maintenance intervals are most accurately scheduled on the basis of fuel consumed rather than service hours.

#### Daily

Walk-around Inspection - Inspect engine for
leaks and loose connections71
Engine Crankcase – Check oil level
Cooling System – Check coolant level
Water Separator (If Equipped) – Drain water
Air Cleaner – Check service indicator/Service air
cleaner when needed/Clean Precleaner (if
equipped)
Clutch (If Equipped) – Check/Adjust/Lubricate 76

### **Every 50 Hours**

Light Duty Air Cleaner (If Equipped) - Replace ..... 77

# First 3800 L (1000 gal) of Fuel or 200 Hours or Three Months

Valve Lash - Check/Adjust (at first oil change) 97
Magnetic Pickup – Inspect/Adjust (at first oil
change) 107

# Every 3800 L (1000 gal) of Fuel or 200 Hours or Three Months

Scheduled Oil Sampling (S•O•S) – Obtain	
sample and analysis7	<b>'</b> 8
Engine Crankcase - Replace oil and oil filters 7	/8
Fuel System – Clean primary fuel filter (if	
equipped)/Replace final fuel filter 8	30
Fuel Tank - Drain water and sediment 8	33
Cooling System (Conventional HD Coolant	
Only)- Test for SCA concentration OR obtain Level	
I coolant analysis/Add SCA if necessary	33
Radiator - Inspect/Clean 8	35
Air Cleaner - Clean/Replace air filter elements 8	36
Belts - Inspect/Adjust/Replace when necessary 8	38
Hoses and Clamps - Inspect/Replace when	
necessary	39
Batteries - Clean/Check electrolyte level	

## Every 22,700 L (6000 gal) of Fuel or 1200 Hours or One Year

Engine Protective Devices - Inspect/Check	
Engine Mounts – Inspect	92
Crankshaft Vibration Damper – Inspect	93
Water Separator - Replace element	94
PCV Valves – Clean/Check	96
Valve Lash - Check/Adjust	

#### Every 45,500 L (12,000 gal) of Fuel or 2400 Hours or Two Years

Fuel Injection Nozzles - Test/Exchange	99
Fuel Ratio Control (If Equipped), Set Point and	
Low Idle - Check/Adjust 10	)()
Fuel Pump/Governor Housing - Drain water 10	)0

# Every 57,000 L (15,000 gal) of Fuel or 3000 Hours or Two Years

Water	Temperature	Regulator	(Thermostat) -
Develope	-		

Replace	101
Cooling System (Extended Life Coolant Only) -	
Add Extender	102
Cooling System (Conventional HD Coolant Only)	
- Drain/Clean/Replace coolant	102

# Every 68,000 L (18,000 gal) of Fuel or 3600 Hours

Water Pump - Inspect/Rebuild or Exchange	105
Starter Motor - Inspect/Rebuild or Exchange	105
Air Compressor - Inspect/Rebuild or Exchange	105
Flywheel Ring Gear - Inspect	106
Fan Drive - Inspect/Check	106
Belt Tightener Assembly - Inspect/Check	106
Magnetic Pickup - Inspect/Adjust	

### Every 114,000 L (30,000 gal) of Fuel or 6000 Hours

Overhaul	108
Cooling System (Extended Life Coolant Only) -	
Drain/Flush/Replace ELC	111
