Attention: Mr. Matt Deskins, Environmental Quality Analyst

RE: SRN / ID: A0394

Dear Mr. Deskins,

Per notice A0394, dated May 2, 2019 (for the April 24, 2019, visit), regarding the pressure drop across the two scrubbers at LECO Facility located at 3000 Lakeview Avenue, Saint Joseph, MI, these values were recorded daily by the previous Waste Water Treatment Operator.

Since his last day of work, August 8, 2018, there was miscommunication between Plating, Maintenance, and Compliance departments with regard to monitoring the pressure drop. As a result, readings were not taken.

Effective May 1, 2019, we have resumed taking daily reading for these two (2) scrubbers (EUColag 75Hp and EUColag 40Hp) per requirement 1.8 listed in the Activity Report.

Please let us know if you have any questions, 269.985.5790 or tracy_tibbitts@leco.com.

Sincerely,

Tracy Tibbitts, Environmental Engineer
