Attn: Ms. Dorothy Bohn, EQA12

RE: DEQ-Violation Notice [Second]

Dear Ms. Bohn:

Thank you for your email on the 26th of August 2014 and your letter that we have received on August 22nd, 2014 regarding our facility in Kalamazoo, MI.

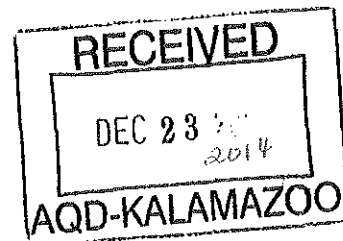

DEQ asked that we respond to the Second Violation Notice by September 5th, 2014. This is an important resolution, and unfortunately I do not have all the information I need in order to present my case by that date. I am asking you to consider whether it would be possible for me to supply you with our findings by September 19th. 2014.

I would very much appreciate such an extension, and assure you that I will be able to make a firm decision by that date.

Thank you very much for your consideration of my request.

Sincerely,
Stress-Con Industries, Inc.

Habib El-Jizi, CE, JD
Director

STRESS-CON INDUSTRIES, INC.

Dec 2014

Ms. Bohn,

On your visit you noticed dust coming from the top of our cement silo. After investigating the seal for the cover was not sealing properly and when filling the silo dust would escape. After realizing this Stress-con immediately replaced the seals and doors on both silo's. This has been fixed and stopped dust leaking from the top of the Silo.

We do dust control on our yard by using a water tanker that we pull with tractor soaking the ground with city water. We do this when dusty conditions are in the yard. We do this mostly during the dry season which is mostly summer but have used it in spring and fall. I did not know that I had to keep a log book on this but will start one and keep track.

Stress-con apologizes for any inconveniences that we may have caused and get on top of this right away.

Sincerely,

Tom Grzeskowiak
