On July 21, 2014, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of Stress-Con Industries (Facility), located at 3102 East Cork Street, Kalamazoo, Michigan. The purpose of this inspection was to determine the Facility's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the administrative rules; and the conditions of Permit to Install (PTI) Numbers 401-75 and 380-78.

During the inspection, staff of the AQD observed the following:

In addition, after leaving the Facility they began operation. What appeared to be a cloud of dust coming from the west side of the concrete plant was noticed. What was/is the cause of this cloud of dust? What has been/will be done to correct the cloud?

On July 22, 2014, via email, the name and address of the crushing company that has been hired to crush your scrap concrete was requested. If you have not responded to that email as of the date of your response to this letter, please include that information in your response.

Please initiate actions necessary to correct the cited violation and submit a written response to this Violation Notice by August 13, 2014. The written response should include: the dates the violation occurred; an explanation of the causes and duration of the violation; whether the
