05/31/2018	MAERS	Compliance	On May 29, 2018 I emailed the facility contact about the lack of combustion emissions included with this report. No response has been received as of May 31, 2018. During my previous inspection, the facility was undergoing a personnel change, which may be the reason for the lack of response. I will ask the facility for combustion data during my next onsite inspection. This report was received on time and all of the PM reported emissions appear to be reported accurately. Combustion emissions will be evaluated once received.
