# Midwest Rubber Company

1-25-2023  
Midwest Rubber Company  
Janet Brown

EGLE, AQD  
Bay City District

In regards to notice of violation dated January 12, 2023 Midwest Rubber Company strives to be a good corporate citizen.

EGLE conducted an Air inspection resulting in a violation notice dated May 24, 2022 and comments on current recordkeeping. We have corrected the recordkeeping and been in contact with the EGLE representative throughout the process and updating.

Cell #2 –Chlorination of rubber products process was originally set up for Rule 290. We have discussed with the EGLE representative extensively about our process of chlorinating our product. Since the original installation our sales have almost tripled therefore resulting in our being out of compliance with Rule 290 and no longer qualifying for the exemption. This process will not change and may increase in volume through the coming years.

We have always reported our Chlorine usage annually as required and will continue to report through the process of attaining a permit for Cell #2.

With the help and understanding of EGLE we are now required to apply for a PTI for the chlorination process (chlorine gas usage). We are currently gathering the necessary calculations to submit with the application.

We expect to have all documentation completed by February 3<sup>rd</sup>, 2023 and submitted with the completed application.

Midwest Rubber will comply too all stipulations enforced through the permit when issued.

Regards,

Janet Brown
