Dear Mr. Larson:

**VIOLATION NOTICE**

On May 13, 2021, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Rieth-Riley Construction Company, Lansing (Rieth-Riley) located at 4150 South Creyts Road, Lansing, Michigan. The purpose of this inspection was to determine Rieth-Riley's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) number 97-03A.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
SV-001 Stack Height	PTI 97-03A, Condition 1.24	Stack Height determined during inspection is less than the minimum permitted height of 44.3 feet above ground level

During the inspection, AQD staff utilized a Nikon Forestry Pro II Rangefinder to determine the stack height of SV-001. Two measurements were taken at two different locations, measuring from the base of the footing to the rim of the stack. Both measurements indicated a stack height less than the 44.3 foot minimum stack height required in PTI 97-03A, condition 1.24. The data recorded from the rangefinder were 35.9 feet and 35.6 feet. The AQD staff informed Rieth-Riley staff of this finding during the inspection.

Please initiate actions necessary to correct the cited violation and submit a written response to this Violation Notice by July 5, 2021, (which coincides with 21 calendar days from the date of this letter).
