RE: Violation Notice January 24, 2017
Industrial Container Services – MI, LLC
SRN: B1715

Ms. Lazzaro,

This letter is in response to the Violation Notice dated 1/24/17 pertaining to a failure to properly maintain a record of Hazardous Air Pollutant emissions.

The original spreadsheet used was created some time ago and was not properly updated over the course of use with the addition/deletion of coatings and constituents. Dan Belfer, Facility Manager, ICS-MI, revised the coating usage spreadsheet on 1/24/17 with the current coating manufacturers' content.

On 2/2/17, confirmation was received that the current spreadsheet meets the necessary requirements for HAPs. The 2016 coating usage has been updated with the revised HAPs calculations. All future coating usage and emissions data going forward will be entered into the revised spreadsheet.

The facility wide Potential to Emit demonstration is scheduled to be completed and submitted on or before March 3, 2017. The Malfunction Abatement / Preventative Maintenance Plan for the drum furnace will also be completed and submitted on or before March 10, 2017.

Regards,

Brian Grannan
Senior Engineer
