Re: Sunoco Partners Marketing & Terminals, L.P. (SPMT)
River Rouge Terminal
March 17, 2014- NOV Response

Dear Mr. Zynda:

This letter is in response to the Violation Notice dated March 17, 2014 regarding the SPMT River Rouge Terminal. The Violation states the following:

"Facility failed to verify the VOC emission rate from the vapor collection system within 180 days of permit issuance (testing deadline was January 5, 2014)... Per email communication with Ms. Laird on March 12, 2014, AQD is aware that the facility is planning to conduct testing during May 2014. However, since the facility did not apply for a permit modification to request an extension of the testing deadline prior to January 5, 2014, this permit condition is determined to be in noncompliance until Sunoco conducts the required testing of VOC emission rates from EUGASLOADING, at which time this violation will be considered resolved."

SPMT personnel changes during the permit renewal process in 2013 resulted in some confusion regarding stack testing requirements. SPMT contacted AQD upon discovering this issue and has arranged for testing to be completed on May 22, 2014. AQD has been notified of this test date and the testing protocol has been submitted to AQD for approval.

If you have any questions regarding this matter, I can be reached at (412) 522-2846.

Sincerely,

Alyssa R. Laird
Environmental Specialist
