A visit was made to West Side Sand Blasting, located at 13775 Buena Vista in Detroit, on September 26, 2017, for the purpose of performing an inspection. When I arrived on site, it was evident that the facility is no longer in operation. There were no personnel on site, the doors were locked. The facility appeared to be vacant for some time - fencing had been removed around the loading lot and there did not appear to be any yard maintenance being performed on the property. A Google search of the company name and address seems to verify that the facility is no longer in operation.

Based on this site visit, West Side Sand Blasting located at 13775 Buena Vista in Detroit is determined to be permanently closed at this time. Since I was unable to gain access inside the building, I was unable to determine if equipment had been removed; however, during the last inspection I performed on September 21, 2006, it was determined that the emission units on site at the time were exempt from permitting requirements, and Wayne County permits which had been issued to the facility were voided on October 26, 2006 (additional permits found during file review were voided on December 21, 2011).
