**Subject: Response Letter for Violation for PTI No. 75-21  
United States Gypsum Company, SRN B3518  
River Rouge, Michigan**

United States Gypsum Company (USG) is submitting a response to the letter dated July 27<sup>th</sup>, 2022, regarding the noted alleged violation for failure to submit within 90 days the Malfunction Abatement Plan (MAP) for FG-PRLTEXP, Special Condition III.2 for PTI 75-21 permit issuance.

The permit was issued October 5<sup>th</sup>, 2021, a copy of the malfunction abatement plan was due for submittal to the Air Quality Division by January 2, 2022; during the project period from October 2021 to July 2022, the responsible individuals overseeing this project left the company and division. The permit application was reviewed in July 2022 by the new responsible parties and the malfunction abatement plan was identified as not being submitted to date. United States Gypsum is currently in process of finalizing the malfunction abatement plan for submittal prior to the initial operation of equipment authorized under FG-PRLTEXP, but no later than September 30<sup>th</sup>, 2022. To prevent future re-occurrence the PTI requirements have been added to the Engineering Project Execution Form and Compliance Checklist.

Please direct any questions regarding this response letter to Sarah Messa at 313-624-4230 or via email at [smessa@usg.com](mailto:smessa@usg.com).
