RE: Violation Notice R336.1201 & 40 CFR Part 60

Please use this letter as response to the Violations listed above for our company. We take full responsibility for the Violations with the following explanation: We assumed that the Permit # 398-75 was in place. We were not aware that another Application/Permit would be required simply because of some modifications that was done to the Crusher that has been in place since 1975. We have certainly maintained the equipment, we have water bars to control any dust and we also have a water tank truck that also controls any dust in and around the area.

We are now in the process of filling out the application for a current permit and appreciate your patience and your time.

  
Larry Throesch  
Yard & Mechanical Director
