05/31/2016	MAERS	Compliance	<p>2015 MAERS was timely submitted online on 2/11/16. ROP certification postmarked 2/15/16. The report was audited and passed the audit on 5/31/16</p> <p>The emission summary attached to MAERS reporting includes the VOC, NOx and CO emission calculations for each SCC and emission units (Valves, flanges, relief valves LPG Loading Rack, Flares). It shows that the total VOC emissions are 68.75 Tons; predominantly fugitive emissions from valves (53% of the total VOC emissions), relief valves (23%) and flanges/connectors ((18.8%) .The rest are minor emissions from LPG Loading Rack and other miscellaneous. NOX (0.13 tons) and CO (0.72 tons) are emitted in insignificant proportions from relief valves and from projects related flaring. The emissions this year are very similar to the last year's emissions</p>
