 AIR QUALITY DIVISION
 ACTIVITY REPORT: Self Initiated Inspection

M315831037

FACILITY: International Mold Corp.		SRN / ID: M3158
LOCATION: 21481 CARLO DR, MOUNT CLEMENS		DISTRICT: Southeast Michigan
CITY: MOUNT CLEMENS		COUNTY: MACOMB
CONTACT: Leo Thomas ,		ACTIVITY DATE: 08/25/2015
STAFF: Joyce Zhu	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: self-int. inspection		
RESOLVED COMPLAINTS:		

On 8/25/2015, I conducted a self-initiated inspection at International Mold Corp., which is located on 21481 Carlo Dr., Clinton Twp. The inspection is initiated due to an active permit (#1056-89) issued to Osborne Transformer Corp. for the same site without any current information of the location. I arrived at the area around 11:30 AM. The location is now occupied by International Mold Corp. I introduced myself to Mr. Leo Thomas from the facility & explained the purpose of the inspection. Mr. Thomas took me to see the process.

Inspection:

In this facility, they trim plastic parts. There are several injection molding machines. All the activities are vented to the in-plant environment. The process is exempted from the permit to install requirements per Rule 286. The existing permit #1141-90 was for surface coating process, which has been removed from the site. I'll advise permit section to void the permit.

In conclusion, the facility appeared to operate in compliance with Air Quality Regulations.
