COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
020	
	DR, LINCOLN PARK dinator/Interim Site Manager

An inspection was performed a BASF Corporation located at 1512 John A. Papalas Drive, Lincoln Park. The company submitted a request to AQD, dated February 26, 2020, to void PTI No. 35-09C since the facility had ceased operations. The purpose of the inspection was to verify that the facility was no longer in operation and all equipment had been removed.

I met with Mariana Pipoli Runho, EHS Specialist for BASF (734-324-2713), at the facility on March 9, 2020. We performed a walk-through of the facility and I verified that all equipment had been removed from the site. Ms. Pipoli Runho stated that the facility ceased operations in October 2019, and all equipment was shipped off-site to BASF's Spartanburg, South Carolina facility. BASF was leasing the 1512 John A. Papalas Drive address and will no longer have access to the building after this week.

Based on the inspection, the facility is considered to be permanently closed and the request to void PTI No. 35-09C will be approved.
