RE: EQ Detroit, Inc. (DBA US Ecology – Detroit South) – Response to Violation Notice dated August 15, 2017 – Alleged Nuisance Odors on August 13, 2017

Dear Mr. Lamb:

This correspondence is US Ecology – Detroit South's (USE-DS) response to the Violation Notice (VN) dated August 15, 2017 regarding odors allegedly emanating from USE-DS's operation and in violation of PTI No. 269-04E; General Condition 6 and R336.1901(b) on August 13, 2017. Inspections conducted by MDEQ-AQD in response to complaints reportedly found a strong (level 3 to 4) lime dust and chemical-type odors attributable to USE-DS's operations, impacting areas downwind of the facility.

MDEQ indicated via email on August 14, 2017 at 2:35pm that the subject odor complaint was investigated by Todd Zynda of MDEQ at 9:00pm on August 13, 2017. USE-DS had a drum dock worker on site from 5:00pm to 11:00pm on August 13th. The Manager of Chem-Fix checked with the drum dock employee on Monday August 14th to find out if he noticed odors on the evening of August 13th. The employee stated that he did not notice any odors emanating from the facility at any time during his shift.

Furthermore, when odor complaints of this nature are identified, it is typically during the solidification process. However, this process was not being conducted during the time of the odor investigation. The operator who completed the solidification process (or basically dried the vault) left at 1:30pm. At this point the vault was drying and the solidification operations ceased. This would have been seven and a half hours prior to the odor investigation.

Unequaled service. Solutions you can trust.
USEcology.com

In conclusion, it is USE-DS's stance that the subject Notice of Violation be rescinded as the nuisance odors observed by MDEQ at 9:00pm August 13, 2017 could not be from our facility based on the fact that the process was shut down seven and a half hours prior to the odor investigation and the complainant's location is over a mile from the facility.

USE-DS takes odor management very seriously and remains diligent in its efforts to prevent nuisance odors by scrutinizing waste profiles prior to approval, proactively monitoring for odors offsite, and continuing routine preventative maintenance on the baghouses and odor neutralizing system. USE-DS appreciates MDEQ's assistance in these efforts by notifying us of potential issues and following-up with investigations. In order to enable USE-DS to respond most effectively to odor concerns, we ask that MDEQ continue to notify Raymond Landsberg, General Manager, and Tabettha Peebles, Environmental Compliance Manager, as soon as possible with all essential details when any odor complaint potentially relating to USE-DS is received. This will allow USE-DS to immediately investigate and potentially respond to the complaint and report the results back to MDEQ.

If you have questions concerning this response, please feel free to contact Tabettha Peebles at (313) 347-1328.

Sincerely,

Raymond Landsberg
General Manager
