Dear Ms. Peebles:

VIOLATION NOTICE

On August 2, 2018, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), investigated complaints of nuisance odors in the vicinity of U.S. Ecology Detroit (South), located at 1923 Frederick, Detroit, Michigan. The purpose of the investigation was to determine U.S. Ecology's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) number 269-04H.

I performed the investigation from approximately 7:05 AM to 8:00 AM on August 2, 2018, and observed the following air pollution violation:

Process Description	Rule/Permit Condition Violated	Comments
Chem-Fix	R 336.1901(b) PTI No. 269-04H; General Condition 6	Moderate to strong (Level 3 and 4), persistent lime dust and chemical-type odors, attributable to U.S. Ecology's operations, impacting areas downwind of the facility.

R 336.1901(b) states, in part:

"A person shall not cause or permit the emission of an air contaminant in quantities that cause injurious effects to human health and property, or the unreasonable interference with the comfortable enjoyment of life and property."

During the investigation of August 2, 2018, I detected moderate to strong, persistent lime dust and chemical-type odors in residential areas downwind of the facility which were traced back to U.S Ecology Detroit (South). In my professional judgment, the odors observed were of sufficient intensity and frequency so as to constitute a violation of R 336.1901(b) and General Condition 6 of PTI No. 269-04H.

Ms. Tabettha Peebles
