FACILITY: OAKWOOD CUSTOM COATING		SRN / ID: M4656
LOCATION: 12023 DELTA DR, TAYLOR		DISTRICT: Detroit
CITY: TAYLOR		COUNTY: WAYNE
CONTACT: Mike Wimberly, Corporate Facilities Manager		ACTIVITY DATE: 03/01/2018
STAFF: Jill Zimmerman	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Target Inspection		
RESOLVED COMPLAINTS:		

DATE OF INSPECTION : 3/1/2018
 INSPECTED BY : Jill Zimmerman
 PERSONNEL PRESENT : Mike Wimberly, Corporate Facilities Manager
 FACILITY PHONE NUMBER : (734) 231-3603
 EMAIL ADDRESS : mwimberly@theoakwoodgroup.com

FACILITY BACKGROUND

Oakwood Custom Coating was located in the City of Taylor on the southeast corner of the Delta Avenue and Brest Road intersection in a mainly industrial setting. The nearest residential area was adjacent to the facility on its east corner. The facility was considered a minor source, although this facility had previously been registered as a 208a source. The purpose of the inspection was to determine the facility's compliance with state and federal air pollution regulations, as well as the permit conditions agreed upon.

COMPLAINT/COMPLIANCE HISTORY

No complaints have been received since the last inspection in March 2006.

PROCESS EQUIPMENT AND CONTROLS

Oakwood Custom Coating was a parts coater, coating automotive speaker grill covers and interior trim panels for automobile parts manufacturing companies and for auto parts suppliers. The company cleaned the parts and then coated each part with one of the two types of coating. Plastic parts were sprayed on the liquid line and metal parts were powder coated. Each line had a dry off oven and a bake oven. There was also a burn off oven used to clean the parts. A sand blast unit had been removed from the facility. Oakwood Custom Coating operated one liquid paint line, and one powder coating line, with a natural gas-fired curing oven.

INSPECTION NARRATIVE

Ms. Jill Zimmerman arrived at the site at 10:00 am to conduct a targeted inspection.

When I arrived at the facility, no vehicles were parked in the parking lot, and the lights were off. All the furniture from the lobby had been removed, as it was empty. The front door was locked.

During my inspection with The Oakwood Group (SRN N6998), who owns this building, I was told that no production occurs at this location. The building is used for warehouse space for The Oakwood Group.

APPLICABLE RULES/PERMIT CONDITIONS

Currently the facility has Wayne County permits numbered C-10448 & C-10449 for the installation of small plastic parts coating line with a spray booth and a curing oven, and Wayne County permits numbered C-9710 through C-9715 for the installation of two powder coating lines – four powder spray booths with cartridge filter dust collector and a batch burn

off oven with integral afterburner, and a blast – n – peen equipment with a baghouse dust collector. All the equipment has been removed from this location.

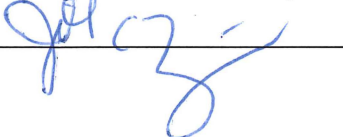

Because the equipment has been removed from this location, and no operations are currently occurring at this location, these permits have been voided.

MAERS REPORT REVIEW

The facility is no longer required to submit MAERS. MAERS was last submitted for reporting year 2008 and appeared to be accurately submitted.

FINAL COMPLIANCE DETERMINATION

Oakwood Custom Coating is no longer operating at this location. All permits will be voided.
