

DEPARTMENT OF ENVIRONMENTAL QUALITY  
AIR QUALITY DIVISION  
ACTIVITY REPORT: Scheduled Inspection

N062932571

FACILITY: Anderson Development		SRN / ID: N0629
LOCATION: 525 Gulf Street, ADRIAN		DISTRICT: Jackson
CITY: ADRIAN		COUNTY: LENAWEЕ
CONTACT: Christopher Goeloe , Vice President, Quality and Responsible Care		ACTIVITY DATE: 12/16/2015
STAFF: Michael Gabor	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Scheduled, announced inspection. Facility is temporarily closed. Anderson maintains the building / site and may start a new process in the future.		
RESOLVED COMPLAINTS:		

**Scheduled, announced inspection of Anderson Development's true minor source facility located at 525 Gulf Street in Adrian, Michigan 49221.**

**State Registration Number (SRN): N0629**

**Facility Contact: Chris Goeloe (CG), VP of Quality and Responsible Care, 517-438-5324, [Chris.Goeloe@anddev.com](mailto:Chris.Goeloe@anddev.com).**

On December 16, 2015, I conducted an inspection of this facility, which is adjacent to Anderson Development's Synthetic Minor / Opt-Out source located at 1415 East Michigan Street. CG accompanied me during the inspection and I confirmed that previous process-related equipment for nitrogen trifluoride gas production was removed and the facility was idled / temporarily shut down. CG indicated that Anderson will continue to own / maintain the property and may bring a new process to the facility in the future as economic / businesses needs warrant. As such, I updated the facility's status in MACES to "Temporarily Closed."

The Air Quality Division received a request from the facility to void permit number 422-95B and it was voided on November 26, 2014.

I reminded CG that if they decided to commence operations at this site again in the future, to contact the Division and to apply for a new air permit, etc.
