Dear Mr. Siegel:

**VIOLATION NOTICE**

On September 5, 2019, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Hillside Industries located at 550 East Ellis Avenue, Belding, Michigan. The purpose of this inspection was to determine Hillside Industries' compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); and the Air Pollution Control Rules.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Aluminum Foundry Operation	Rule 201	Failure to obtain a Permit to Install.

During this inspection, it was noted that Hillside Industries had installed and commenced operation of unpermitted equipment at this facility. The AQD staff advised Hillside Industries on September 5, 2019, that this is a violation of Rule 201 of the administrative rules promulgated under Act 451.

A program for compliance may include a completed PTI application for the aluminum foundry process equipment. An application form is available by request, or at the following website: [www.michigan.gov/air](http://www.michigan.gov/air) (in the shaded box on the upper right-hand side of the page).

Be advised that Rule 201 requires that a permit be obtained prior to installation, construction, operation, reconstruction, relocation, or alteration of any process or process equipment which may be a source of an air contaminant.
