SRN: N1229, Kent County

Dear Mr. Kowalczyk:

**VIOLATION NOTICE**

On April 23, 2014, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of PRS Manufacturing (PRS) located at 3745 Dykstra Drive, Walker, Michigan. The purpose of this inspection was to determine PRS's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the administrative rules; and the conditions of Permit to Install (PTI) number 915-85.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
BURN-OFF OVEN	Rule 210	PRS has the potential to emit an individual HAP at greater than the major source threshold of 10 tons.

After the inspection, AQD staff requested that a potential to emit demonstration be completed and submitted to the AQD in order to determine PRS's compliance with Rule 210. The potential emissions of HCl for the rack burn-off process are approximately 18 tons per year, which exceeds the major source threshold for an individual hazardous air pollutant of 10 tons per year.

Please initiate actions necessary to correct the cited violation and submit a written response to this Violation Notice by July 17, 2014 (which coincides with 21 calendar days from the date of this letter). The written response should include: the dates the violation occurred; an explanation of the causes and duration of the violation; whether the violation is ongoing; a summary of the actions that have been taken and are proposed to be taken to correct the violation and the dates by which these actions will take place; and what steps are being taken to prevent a reoccurrence.
