STAFF: Joel Asher	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Self initiated inspection of the facility		
RESOLVED COMPLAINTS:		

On 12/1/2016 I conducted an unannounced inspection of this facility. According to the file this was last inspected by Mr. Ed Lancaster on 4/25/2012.

It appears the facility has closed and is no longer in business. There is no activity on the site and no lumber storage observed. The office appears to be vacant. A search on line indicates the business has closed.

PTI #535-86 was issued on 8/18/1986 for a wood-fired boiler and dry kiln. On 4/15/1992 a revision was issued to allow the burning of waste oil in the boiler.

It is likely this equipment is still on the premises. It is not known if the equipment is operational. However, it would be assumed it was operated until the facility closure. Therefore, PTI #535-86 will remain and not be voided as it is possible the facility or a new owner may wish to continue operations with the equipment.

This facility should be monitored to determine if any activities commence at the site.
