Subject: Rule 201 Violation Notice Response

Good afternoon Mr. Lane. In response to the July 21, 2015 violation notice, ASMO Manufacturing, Inc. (AMI) engineering staff and Maintenance Manager are currently collaborating to decide the best course of action to remediate the deficiency found in our regrind operation exhaust system. This violation is ongoing, we have researched the feasibility of retrofitting the current system with the proper filtration, and currently researching that cost and time to the cost and time to apply for permit and install a new system which would bring AMI into compliance. I plan to have a decision on the correction no later than Friday, 9/11, and we can begin the permitting process and obtaining cost estimates and contractor bids for installation. We are setting Friday 9/25 as our tentative date to have that information. I will continue communication as decisions are made to correct the violation.

Thank you Mr. Lane,

Matt Dunklee
Safety, Health and Environmental Specialist
