Re: Violation Notice
SRN: N1781

Dear Mr. Robinson:

This letter is in response to your July 2, 2024 Violation Notice letter (the "Violation Notice"), related to an air-inspection conducted on May 14, 2024 indicating that there was a failure to continuously record the secondary chamber combustion temperature for the burn-off oven.

Holland Mirror's burn-off oven is equipped with a temperature controller and temperature setpoints for the oven and the secondary afterburner chamber. The controller is also equipped with a data recorder that records the afterburner temperature every 10 minutes which is then stored on a removable data disk. Historically, the disk was gathered by site personnel and data was downloaded and retrieved from the disk with the use of a special software program.

In reviewing the data from the fully loaded disk, Magna Holland has determined that the afterburner temperature data had been recorded every 10 minutes from January 8, 2020 until the last recorded temperature data point on May 10, 2022.

The data gap was discovered on May 21, 2024 after locating the disk and successfully downloading and analyzing the information. The disk has since been reformatted and data collection restarted on May 30, 2024. As well, Magna Holland has instituted a procedure to collect this data at the end of each month and storing the files, securely and retrievably, by calendar month, to prevent recurrence of this condition going forward.

Should you have any questions, please feel free to respond to Andrew Dinsmore by e-mail (Andrew.dinsmore@magna.com) or by telephone at 616-786-7000.

Sincerely,

Carl Commons
General Manager

Andrew Dinsmore
