SUBJECT: Level 2 Target Inspection		
RESOLVED COMPLAINTS:		

On 03/12/2018, I conducted a target inspection at the Blue Water Bridge corner Gratiot Avenue in Port Huron, Michigan, for a portable sand blasting equipment/process covered under Permit to Install (PTI) No. 598-88. This permit was issued in July 1989. At the site, I did not observe any sand blasting activity anywhere along the bridge, especially on the United States side. At the office, I tried to call the 2 contact telephone numbers provided in the permit application but the telephone was not even ringing. It seemed that the contact numbers may have been disconnected already.

As a result of my inspection, I am recommending to void PTI No. 598-88.
