**RE: Violation Notice**

Dear Mr. Myott

The intent of this letter is to address the concerns regarding the DEQ inspection conducted on 8/25/2017. We have attached the written response to the concerns that were identified. We are currently working with the manufacturer on a service tech to fly up for a review and inspection of the equipment to make sure we are not missing anything. We have also contacted two other companies that specialize in PLC controls and can possibly set up a chart recorder/interlock.

The main issue is that the Dinamec is not a burn off oven but a fluidized bed of sand. The State of Michigan classifies this equipment in with burn off ovens.

I ask that you be patient as we try to upgrade the system with controls that are not offered by the manufacture.

I will continue to update you on our progress. There is a possibility that March Coating the DEQ and Dinamec will need to meet for a possible modification to the permit if some of the requirements cannot be met and since it is not a burn off oven

Respectfully Submitted,

Mark Tomasik  
VP of Quality
