RE: July 12, 2024 Violation Notice

Dear Sebastian Kallumkal,

Violation PTI 354-97, SC13 and SC14:

Powder Cote II would request that this permit be cancelled and the electrocoating line on this permit be transferred to Permit Number 45-19. The coating material used on both coating systems is the same product that contains no HAPS. Permit Number 45-19 only has an annual VOC limit which is tracked and recorded on a monthly basis without the requirement of an hourly VOC calculation and the limit of 0.2 lb VOC/gallon(less water). Powder Cote II is within the annual tons of VOC limit on permit 354-97.

Violation PTI 571-92 SC 15, PTI 981-92 SC17, PTI 425-97 SC 15 and PTI 212-98 SC 2:

The four burn off ovens on this violation are from 1992, 1997 and 1998. Due to their age and the advancement of burner controls since their installation, Powder Cote II has ordered all new burner controls and temperature recorders for the ovens to improve the operation of the ovens to get back into permit compliance. The controls are supposed to begin arriving starting July 26, 2024. Powder Cote II is requesting a 30 day extension to the abatement period.

A copy of this letter is also being sent to Jenine Camilleri, Enforcement Unit Supervisor in accordance with the violation instructions.

Thank you for your consideration,

Charles Trott
