Subject: Violation Notice Dated December 7, 2017  
Permit to Install No. 239-94B

Reference: Arvron, Inc.  
4720 Clay Avenue SW  
Grand Rapids, Michigan 49548  
SRN: N5296

Dear Ms. Lazzaro:

This letter responds to the December 7 Violation Notice (VN) regarding the notification and testing requirements in Permit to Install (PTI) No. 238-94B for Arvron, Inc. (Arvron).

Arvron has undertaken the following corrective actions to address these issues:

1. Notification of Completion of Installation  
FG-EPS Special Condition VII.1 requires notification within 30 days of completion of construction of the equipment authorized by the subject PTI. This notification was submitted to the DEQ AQD Grand Rapids District on December 5, 2017.
2. RTO VOC Emission and Destruction Testing  
FG-EPS Special Condition V.1 requires that the VOC emission rates and destruction efficiency be verified within 180 days of commencement of trial operation of EU-PE-2. This testing was completed yesterday (December 20), and a complete test report will be submitted to the DEQ within 60 days of completion of the test. Preliminary results indicate that the VOC destruction efficiency and emission rates are well within what is required under FG-EPS Special Conditions I and III of the subject PTI.

You also asked for an explanation of the causes and duration of the violations. These two items were not included in our calendar, and hence the missed deadlines were inadvertent and unintentional. The duration is addressed in our response above. To prevent a reoccurrence, we will ensure that any deadlines contained in the air permit are included in our calendar moving forward.

Thank you for your assistance in helping us resolve these issues that were identified in the subject VN. If you have any questions, please contact me at (616) 530-1888, or Mark Horne of Environmental Partners at (616) 928-9128.

Sincerely,  
ARVRON INCORPORATED
