STAFF: Rob Dickman	COMPLIANCE STATUS: Compliance	SOURCE CLASS: SM OPT OUT
SUBJECT: Site visit to confirm void request by the facility to void PTI 677-96.		
RESOLVED COMPLAINTS:		

A request was sent to void Permit to Install 677-96. Jodi Lindgren and I performed an inspection at this facility per this request. An inventory of pertinent equipment is as follows:

Engine 1, CAT 3516TA without catalytic controls, Unit 1001
One glycol dehy
A total of 9 400 bbl ASTs

The void request indicates the facility has installed a CAT 3516 that is exempt under Rule 258(2)(g) and calculations indicate the engine is heat input rating is 9.9 MMBtu. The use of this exemption appears correct.

On June 12, I notified Sue Thelen that this permit was good to void.
