July 12th, 2017

Mr. Rex Lane
Michigan Department of Environmental Quality
Kalamazoo District Office
Air Quality Division

Dear Mr. Lane,

This is in response to the violation notice Woodworth received following the inspection by MDEQ on June 8th, 2017 concerning our Emergency Standby Generator.

Woodworth was unaware when we purchased the Generator, nor did our supplier inform us that the Generator exceeded the exemption rule limitation under State air quality rule 336.1285(2)(g).

Woodworth has worked with MDEQ to have 3 different issued, PTI's No. 64-15A, 144-14, & 145-14 and have our Homer facility incorporated into Brembo NA's ROP No. MI-ROP-N2662-2015. Woodworth strives to comply with all Federal, State, & Local rules & regulations. This is clearly an oversight on our part.

Woodworth has contracted RPS GaiaTech to help us submit our PTI for the Emergency Standby Generator. I will be meeting with Chris Blume of RPS GaiaTech on 7/19/17 to complete the PTI application for the Generator and the subsequent ROP application amendment.

Woodworth hopes to have the Permit to Install completed and sent to MDEQ within the next two weeks to bring us back into compliance.

Sincerely,

Robert S. Lixey
General Manager
Woodworth Inc.
