SUBJECT: FY17 scheduled inspection		
RESOLVED COMPLAINTS:		

FY17 scheduled inspection.

Traveled to N6239 Federated Oil & Gas source located at T30N, R1W, Sec 16 of Charlton Twp, Otsego County, to determine compliance with state and federal air regulations.

This source was on the 2017 minor list of sources to be inspected. The files were reviewed, and the PTI 71-97, which was for a natural gas fired compressor engine, was void on June 29, 2006.

The source is located about 1 mile east of Johannesburg on Heatherton Rd, south side. The source has a sign indicating 'Antrim Resources 1', which was confirmed to be the correct location with Federated Oil & Gas during a 2006 inspection.

The building that housed the previously permitted engine is no longer onsite. An open area remains with a pump jack. Storage tanks referenced in a 2006 inspection report are no longer on site.

This source should be removed from the minor inspection list.

MACES Information screen - description changed to 'void, equipment no longer on site'; operating status changed to 'permanently closed'.

Permit cards - already indicates PTI was VOID - 6/29/06.
