List of Partial Compliance Evaluations :

Activity Date	Activity Type	Compliance Status	Comments
01/11/2016	Scheduled Inspection	Compliance	FY 2016 Targeted Inspection
07/23/2015	ROP Semi 1 Cert	Compliance	ROP Certification for the first semester of year 2015. Received on time. No deviations or monitor downtime reported
05/29/2015	MAERS	Compliance	2014 MAERS report was timely submitted on 2/12/15. The facility submitted documentation supporting their emissions. The report was reviewed by AQD staff and no errors were detected during the audit. The data showed 4% increase in the total fuel throughput with respect to the previous year. Gasoline consumption increased, while diesel usage decreased. The proportion of gasoline to diesel usage was about 58/42, compared to 50/50 in 2013. The total emissions were about 103 tons, with 83% CO and 12% NOx. In 2014, the number of gasoline engines tested for Durability double the number of that type of testing in 2013. Consequently, the CO emissions were lower than in 2013 because this type of testing is conducted using the CO emission control system (Air Injection Control System)
