STAFF: Shane Nixon	COMPLIANCE STATUS: Compliance	SOURCE CLASS: SM OPT OUT
SUBJECT: Partial compliance evaluation - Records review		
RESOLVED COMPLAINTS:		

**AQD staff reviewed records of the following:**

- Log of maintenance activities conducted and all repairs made.
- Monthly and 12 month rolling time period NOx emission calculations
- Monthly and 12 month rolling time period fuel use records.

**Maintenance activities were well documented and demonstrated the compressor engine is adequately maintained. NOx emission calculations were verified and demonstrate compliance with the facility-wide emission limit of 89 tons per 12 month rolling time period. The records indicate the highest 12 month rolling time period NOx emissions was 18 tons in January 2016. Monthly and 12 month rolling time period fuel use records were maintained, documented, and used in calculating NOx emissions.**
