

DEPARTMENT OF ENVIRONMENTAL QUALITY  
 AIR QUALITY DIVISION  
 ACTIVITY REPORT: On-site Inspection

N687858953

FACILITY: T&T Tools, Inc.	
LOCATION: 4470 128th Avenue, HOLLAND	
CITY: HOLLAND	
CONTACT: Robert Thompson, Owner	
ACTIVITY DATE: 07/14/2021	SOURCE CLASS: MINOR
STAFF: Chris Robinson	
COMPLIANCE STATUS: Compliance	
SUBJECT: Unannounced scheduled inspection to determine compliance status with applicable air quality rules and regulations.	
RESOLVED COMPLAINTS:	

On July 14, 2021, AQD staff Chris Robinson (CR) conducted an unannounced inspection of T&T Tools, Inc. (Formerly Atcon International, Ltd) located at 4470 128<sup>th</sup> Avenue in Holland, Michigan. The purpose of the inspection was to determine the facility's compliance status with applicable air quality rules and regulations.

CR was met by Mr. Robert Thompson, owner of the facility. Identification was provided and Mr. Thompson was informed of AQD's purpose for the visit

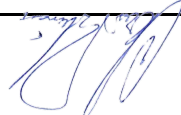

The Weather conditions on July 14, 2021, were approximately 78°F, fair with southwest winds at approximately 8 mph (www.weatherunderground.com). No odors or visible emissions were observed.

Upon meeting with Mr. Thompson, Mr. Thompson informed CR that Atcon had been sold and the building was purchased by Mr. Thompson and is now the home of T&T Tools. T&T tools will retain Atcon's SRN of N6878. Atcon had operated a trichloroethylene vapor degreaser exempt from Rule 201 permitting but subject to the National Emission Standards for Hazardous Air Pollutants promulgated under 40 CFR Part 63, Subpart T. Since the property sale this unit has been removed, which CR confirmed during a walkthrough of the facility with Mr. Thompson.

T&T is a manufacturer of subsurface hand tools. Most of the components are purchased and assembled onsite. Some of which requires minor machining, welding, or forging. All process equipment located at T&T is vented to the in-plant environment. All of the equipment at this facility appears to be exempt from Rule 201 permitting requirements per Rule 285(2)(j) for welding, Rule 285(2)(i)(vi)(B) for equipment used for cutting, turning, drilling, machining, grinding, sanding of metal with emissions released only to the in-plant environment, and Rule 282(2)(a)(i) for the small natural gas forge.

Once the tools are complete, they are sent offsite to another facility for powder coating. No coating operations are conducted by T&T.

Based on the observations and discussion made during the inspection T&T Tools appears to be in compliance with applicable air quality rules and regulations and the facility is no longer subject to 40 CFR Part 63, Subpart T.
