Dear Mr. Arker:

VIOLATION NOTICE

On August 13, 2019, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of A&C Electric located at 41225 Irwin Drive, Harrison Township, Michigan. The purpose of this inspection was to determine A&C Electric's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) number 344-00.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
EU-HEATCLEAN	PTI No. 344-00, Special Conditions 5 and 13	The records of pounds of wire processed per batch in the burn-off oven do not sufficiently demonstrate compliance.

During this inspection, A&C Electric was unable to provide adequate records of pounds of wire processed at the facility. This is a violation of the recordkeeping and emission limitations specified in Special Conditions 5 and 13 of PTI number 344-00.

The conditions of PTI number 344-00 require records to be kept on file of the pounds of coated wire processed in each batch. The records provided during the inspection indicated total pounds of material processed in the oven but did not specify the quantity of coated wire processed. The facility is limited to processing 300 pounds of coated wire per batch in the burn-off oven. The existing records do not demonstrate compliance with this limit.

Please initiate actions necessary to correct the cited violation and submit a written response to this Violation Notice by October 18, 2019 (which coincides with 21 calendar
