

INTEGRITY IS OUR PHILOSOPHY

February 12, 2015

Mr. Stephen Lachance
Environmental Quality Specialist
350 Ottawa Avenue NW
Grand Rapids, MI 49503-2341

Dear Mr. Lachance:

I am writing in response to the emission violations that have happened in the following three instances:

- March 27, 2015 – 524.08 pounds (Duration - 1 day)
- November 12, 2015 – 495.54 pounds (Duration - 1 day)
- January 4, 2016 – 587.89 pounds (Duration - 1 day)

The March and November occurrences were primarily produced by a higher pentane content from a new supplier. The January occurrence was caused by ramp up after a holiday shutdown period.

Process for abatement:

- 1.) Implemented a tracking sheet at the expander to calculate the emissions for a day's timeframe. (See enclosed process sheet.) This process was implemented the week of February 1st.
- 2.) Sourcing a portion material to a supplier with a lower incoming pentane composition.

Please feel free to contact me if there are any further questions and or any clarification needed.

Sincerely,

Thomas Winks
