

DEPARTMENT OF ENVIRONMENTAL QUALITY  
AIR QUALITY DIVISION  
ACTIVITY REPORT: On-site Inspection

N703164844

FACILITY: RIVERSIDE - FRASER 8 CPF		SRN / ID: N7031
LOCATION: Fraser Twp, Section 8, T16N, R4E, FRASER TWP		DISTRICT: Bay City
CITY: FRASER TWP		COUNTY: BAY
CONTACT: Carolann Knapp,		ACTIVITY DATE: 09/27/2022
STAFF: Benjamin Witkopp	COMPLIANCE STATUS: Compliance	SOURCE CLASS: SM OPT OUT
SUBJECT: Facility Inspection		
RESOLVED COMPLAINTS:		

Riverside Energy purchased Michigan based assets previously owned by Breitburn. One of the assets was the Fraser 8 site located in Fraser Township at the end of Erickson Rd west of Fraser Rd in Bay County Michigan. The facility is covered by permit 301-01C. It was last inspected in September of 2018 at which point the natural gas being processed at the facility was quite low.

Since the last inspection the facility did not operate in 2020 or 2021 based on submittals through the Michigan Air Emissions Reporting System (MAERS) and conversations with Brietburn personnel.

Steve Scholl who deals with pipeline operations for Riverside also stated the facility had not run for a few years. The facility was not operating on September 27, 2020.

Natalie Schrader, Riverside's Compliance Coordinator wishes to keep the air permit active since they are in the process of evaluating the various assets the company purchased from Breitburn.

**CONCLUSION**

The site is considered to be in compliance due to being non-operational at this time.
