SUBJECT: pet crematory		
RESOLVED COMPLAINTS:		

On 10/20/2015 I conducted an inspection of this facility.

The pet crematory has not been run in several months. Records show the last date of operation was 4/30/15. Records are available showing the date and weight of each cycle. Mr. Wambach also had the paper strips from the strip chart recorder showing the combustion temperature of the secondary combustion chamber. He stated it is likely they will install a digital temperature logger as the paper for the strip chart recorder is difficult to find.

The unit has undergone repairs throughout the summer. It is almost ready for operation. A new lip needs to be welded around the charge door. Once this is complete, new refractory will be installed in the combustion chamber.

The facility has maintained the proper records to show compliance with PTI #361-01. No complaints have been received regarding this facility.

This facility is considered in compliance with PTI #361-01 and the Air Pollution Control Rules.
