<b>RESOLVED COMPLAINTS:</b>		

This is a source that has no active permits and is operating under exemptions. I sent a records request to VCP on November 25, 2024. Jeremy Lewandowski of ECT responded that the equipment has been removed from this location. So I did a site visit to determine that status of this source.

Once onsite, there is no longer any buildings, nor any equipment. Only a pump jack and a few pipes sticking out of the ground where the building was. Google Earth Imagery from 2016 shows that there was a building and 1 AST tank onsite.

I will close this source out, and remove it off of AQD lists.
