<b>SUBJECT:</b> Ownership change and operating status.		
<b>RESOLVED COMPLAINTS:</b>		

Recent review of the emissions reporting spreadsheet for changes brought up name change and contact questions regarding this facility. During the process of the 2020 FCE for this facility, the AQD was informed that the facility had been sold and is no longer owned by NorthStar Energy. The name of the entity taking ownership was unknown as the company had not yet been formed. At the time of the FCE none of the equipment on site was operating. The AQD still has not received notice of a change in ownership from the new company.

I conducted a site visit to determine if there were any indications of new ownership and to determine the operational status of the facility. At that time the facility was gated and was not operating. There were no new signs indicating new ownership. NorthStar Energy signs were still in place. All of the same equipment observed during the FCE was still on-site in the same condition. Other than the notification from NorthStar there is no indication of a new owner.
