STAFF: Joel Asher	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Crematory		
RESOLVED COMPLAINTS:		

On 9/24/2014 I conducted an unannounced inspection of this facility. My contact was Mr. Jason Sedar.

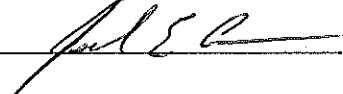

The facility continues to operate their human crematory permitted under PTI #149-04. The owner, Mr. Larry Joosten was not available so Mr. Sedar escorted me to the unit. As required under Special Condition 1.5, the facility has a circular chart recorder to monitor and record the operating temperature of the secondary combustion chamber. Records of all cremation cycles were kept for 2014, (other years were available but were not reviewed). Several cycles are recorded on each chart with the date of each cremation cycle written on the chart.

All cycles show an operating temperature of the secondary combustion chamber to be above 1600 degrees as required by Special Condition 1.3.

The unit appeared to be in good condition and no issues were observed.

No complaints have been received regarding this facility.

The facility appears to be in compliance with PTI # 149-04 and the Air Pollution Control Rules.
