Warren, MI 48092

Dear Mr. Bognar:

**VIOLATION NOTICE RESPONSE**

During our review on October 29, 2020, Lincoln Memorial Park Crematorium experienced an occurrence of the secondary combustion chamber temperature falling below the necessary temperature of 1650 degrees F. Our technician responded promptly and was able to restore the retort to 1600 degrees by controlling the burners manually.

Lincoln Memorial Park Crematorium has a Maintenance Agreement with Matthews Cremation, the manufacturer of our retorts. Annual Inspections are performed by Matthews to help keep us in compliance. However due to Covid problems their normal service response time was delayed.

December 3<sup>rd</sup>, 2020, Matthews technician, La Don Mckinney, performed the necessary gas adjustments on the machine which had the temperature issue. (See the attached report.)

Matthews Cremation has both machines scheduled for their annual maintenance on December 14<sup>th</sup> and 15<sup>th</sup>, 2020. Preventative annual maintenance inspections and adjustments as necessary are the key to preventing future issues. We can assure you every effort is made to perform our duties in compliance with all necessary regulations.

Respectfully,

  
Susan Sullivan, President  
cc: Ms. Jenine Camilleri.
