SRN: N7896 Premier Finishes
28060 Groesbeck
Roseville MI 48066

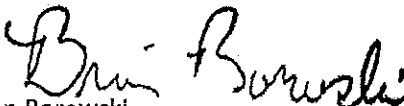

Attn: Robert Elmouchi;

Premier Finishes kept records of filter changes & cleaning procedures after 2010, we misunderstood that we were to keep these records on file indefinitely. We also didn't realize we were supposed to send them to DEQ. We had not been notified by DEQ or been in contact with them for 7 years, we discarded all records pertaining to the filter changes, cleaning procedures & training.

Starting immediately, Premier Finishes will resume keeping and recording the daily, monthly and quarterly reports of A.M. and P.M. inspections of equipment, filter changes and cleaning of equipment, pressure readings and employee training on the sandblast equipment. Employee training will be initiated every 6 months and these reports along with the others will be forwarded to DEQ every quarter.

Premier Finishes will also keep daily records of paint sprayed in each booth to ensure paint is below the 200 gallon per month requirement.

Sincerely,

Brian Borowski
