Dear Scott Hoover:

VIOLATION NOTICE

On June 7, 2023, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Leading Edge Fiberglass Pool located at 3090 W. Cook Road, Grand Blanc, Michigan. The purpose of this inspection was to determine compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) number 53-08B.

During the inspection, staff found the following:

Process Description	Rule/Permit Condition Violated	Comments
FGFIBERGLASS - Fiberglass pooling manufacturing process with spray application of resin(s), gelcoat(s), catalyst material(s), and usage of mold release, mold cleaner (other than acetone), wax, and additives. Also, includes miscellaneous cleanup activities using acetone.	PTI 53-08B, FGFIBERGLASS, Special Condition (SC) I.1	In May 2023, emissions of VOC were 10.1 tpy (based on a 12-month rolling time period) exceeding the 10.0 tpy (based on a 12-month rolling time period) VOC emission limit in SC I.1.

The records provided demonstrate that actual emissions of volatile organic compounds (VOC) from the process equipment in FGFIBERGLASS were 10.1 tons per year (tpy) based on a 12-month rolling time-period as determined at the end of each calendar month in May of 2023.

The conditions of PTI number 53-08B limit the emissions of VOC to 10.0 tpy based on a 12-month rolling time-period as determined at the end of each calendar month from FGFIBERGLASS. This is an exceedance of an emission limit in PTI number 53-08B.
