Salutations,

On October 3rd, 2022 Shelby Cabinets will use VC16936 Exempt Reducer, Fast to cut/reduce product WS2VB6 [WOODSONG II AMAZING Stain Base] moving forward. Per our representative of DSI [Distributor Service Inc.], David Zaffarano, VC16936 product is Zero VOC & GREENGUARD Certified. Per his calculations Shelby Cabinets will use 25% or more of the VC16936 to cut the WS2VB6 [Greenguard Certified] which will reduce the material limit well under 6.1 lb/gallon and more if over the 25% of the VC16936. Shelby Cabinets will track this information of usage for VC16936.

Shelby Cabinets is not in violation of code R 336.1201 (Rule 201) on October 3rd, 2022. Previous Inspectors asked questions however never requested nor required tracking on the Hot Melt adhesive used for cabinet assembly because we meet the less than 2 gallons/day exemption code R336.1287(2)(a). I have enclosed the last 2 invoices of the hot melt we ordered along with Material Certification, and the technical data sheet. The Hot Melt adhesive is ordered by the pound [not gallon]. We order 300 lbs every six months, which is 10 boxes and each box is 30lbs. Moving forward Shelby Cabinets will be tracking the date of when a new box Hot Melt adhesive is opened and will have those for future records.

Sincerely,

Tom Urbin
