

**DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
ACTIVITY REPORT: Scheduled Inspection**

N828025352

FACILITY: KEYSTONE AUTOMOTIVE - DIV OF LKQ CORP		SRN / ID: N8280
LOCATION: 5835 VINING RD, GREENVILLE		DISTRICT: Grand Rapids
CITY: GREENVILLE		COUNTY: MONTCALM
CONTACT: Melissa Bignall, Administrative Assistant/Inventory and Purchasing		ACTIVITY DATE: 06/03/2014
STAFF: Eric Grinstern	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Unannounced Inspection		
RESOLVED COMPLAINTS:		

Unannounced inspection of Keystone Automotive – Division of LKQ Corporation.

Upon entering the facility, staff met with Melissa Bignall, Administrative Assistant/Inventory and Purchasing and Kasondra Wilkins, Quality Control & Safety Manager.

FACILITY DESCRIPTION

Keystone is a plastic automotive bumper refurbishing operation. Processes included in the operation include cleaning and forming, sanding, sand blasting and repair, spray on adhesion promoter and spray on primer. The facility has two torit dust collectors that capture emissions above the sanding/repair stations that vent back to the in plant atmosphere.

REGULATORY REVIEW

All processes have previously been determined to be exempt from the need to obtain an air use permit except for the coating line which operates under general permit to install No. 111-09 that limits the coating line to 2000 pounds per month and 10 tons per year.

COMPLIANCE EVALUATION

Review of the facility's VOC emission records for the coating line demonstrated compliance with the 2000 lb./month and 10 tpy limits. Staff noted that the VOC emissions on a 12-month rolling average were identical for the past 12 months.

This is an error resulting from the facility overwriting the data for each month from the previous year, this results in the 12-month rolling average being based upon emissions for future months instead of the previous 11 months. Staff will request the facility correct the records. The facility is still in compliance with the emission limits, regardless of the spreadsheet error.

Based on this inspection, the facility is in compliance with applicable air quality rules and regulations at this time.
