

Dear AQD staff

The crushing at this site has been suspended until a variance is issued. It was our understanding that the 500ft only applied to residential buildings. The Owner of the building in question is one of many that are pushing for the city to clean up the concrete pile and was very pleased that it was being recycled and not just buried.

We thought the notice to start crushing had been sent in the 5 day advance requirement. We will try to keep a better record and be more mindful in the future.
